INNOVATION IN KIDNEY & URINARY HEALTH
A COMPREHENSIVE APPROACH

Presented by the Ryan Hospital Comprehensive Kidney & Urinary Care Service

SYMPOSIUM OVERVIEW

WHEN
Saturday, April 25, 2015
8:00am – 6:00pm
Check-in begins at 7:00am

WHERE
Hill Pavilion Lobby & Auditorium
380 South University Avenue

CONTINUING EDUCATION CREDITS
10 CE Credits Available

REGISTRATION
Non-refundable registration includes breakfast, lunch, snack breaks, and cocktail reception
$195 – Non-Penn Vet Graduate
$150 – Penn Vet Alumni
$150 – Veterinary Technician
Registration open through Friday, April 10, 2015

PROGRAM
7:00am – 8:00am
Check-In/Continental Breakfast

8:00am – 8:50am
Emergency Management of Uremic Crisis (Reineke)

9:00am – 9:50am
Global Approach to Chronic Kidney Disease (Foster)

9:50am – 10:10am
Light Refreshment Break

10:10am – 11:00am
Updates on the Management of Glomerulonephritis (Littman)

11:10am – 12:00pm
Nutritional Management of the Renal Failure Patient (Mosenco)

12:00pm – 1:00pm
Lunch

1:00pm – 1:50pm
Hemodialysis (Foster)

2:00pm – 2:50pm
Anesthetic Management of the Renal Failure Patient (Gianotti)

2:50pm – 3:55pm
Light Refreshment Break

3:55pm – 4:30pm
Surgical and Interventional Approach to Cancer of the Upper & Lower Urinary Tract (Aronson & Clarke)

4:30pm – 6:00pm
Surgical and Interventional Approach to Urinary Calculi (Aronson & Clarke)

6:00pm – 7:00pm
Cocktail Reception
Lillian R. Aronson, VMD, DACVVS, Professor of Surgery, Founder and Director of Penn Vet’s Renal Transplantation Program
After completing veterinary school and an internship at Penn Vet, Dr. Aronson completed a small animal surgical residency at the University of California, Davis. From 1994 to 1996, she was the coordinator of the renal transplantation program for animals at the veterinary school at Davis. Following her residency, she joined the University of Pennsylvania and started Penn Vet’s renal transplantation program. She has a strong clinical and research interest in surgical diseases of the urinary tract, microsurgical surgery, renal transplantation, cardiovascular surgery, and portosystemic shunts. Dr. Aronson is Professor of Surgery at Penn Vet and is a Diplomate of the American College of Veterinary Surgeons.

Dana Clarke, VMD, DACVECC, Staff Veterinarian – Interventional Radiology and Critical Care
Dr. Clarke graduated from Penn Vet in 2006. After graduation, she completed a one-year rotating internship at Michigan State University, followed by a residency in emergency/critical care at Penn Vet. Upon completion of her residency in 2010, she did a one-year fellowship in interventional radiology at the Hospital of the University of Pennsylvania. Since completing the fellowship, she divides her time between patient care in the ICU and ER and interventional radiology within the section of surgery. Her interests include better understanding of the progression and physiology of tracheal collapse, interventional oncology and management of benign and malignant ureteral obstructions.

JD Foster, VMD, DACVIM, Staff Veterinarian – Medicine, Director of Penn Vet’s Extracorporeal Therapy Service
Dr. Foster graduated from Penn Vet in 2002. After a year in small animal private practice, he then completed an internship in Connecticut, followed by an internal medicine residency at the University of Wisconsin. His primary interest is nephrology, particularly dialysis and extracorporeal blood purification. He is the Director of Penn Vet’s Extracorporeal Therapy Service and is involved in several research projects focusing on patients with kidney disease.

Giacomo Gianotti, DVM, DVSc, DACVAA, Staff Veterinarian of Surgery at the University of Turin (Italy) in 2001. He has worked in private practice from 2001 to 2006. In 2007, he was the anesthesia staff veterinarian at the University of Wisconsin. His primary interest is nephrology, particularly dialysis and extracorporeal blood purification. He is the Director of Penn Vet’s Extracorporeal Therapy Service and is involved in several research projects focusing on patients with kidney disease.

Meryl Littman, VMD, DACVIM, Professor of Medicine
Dr. Littman, Professor of Medicine at Penn Vet for 36 years, has written many chapters and position papers about Lyme disease, including the ACVIM Lyme Consensus Statement, and was a member of the RSIS Canine Giemnemonulphritis Study Group. Her interests also include systemic hypertension, tick-borne and other infectious diseases that affect the kidney, and the genetic diseases that affect Soft-Coated Wheaten Terriers, e.g. protein-losing nephropathy (PLN), protein-losing enteropathy, Addison’s disease, and renal dysplasia. Since 1996, she has maintained an Open Registry that lists more than 1,200 Wheaten Terriers affected with genetic diseases. Recently, with the help of geneticist Paula Henthorn and her team, she described the first podocytopathy in dogs, due to the PLN-associated variant alleles in two genes that encode two slit diaphragm proteins, nephrin and filtrin, in Soft-Coated Wheaten Terriers and Airedales, for which a DNA test is now available.

Ariel Mosenco, DVM, DACVIM, Staff Veterinarian – Medicine
Dr. Mosenco graduated from the Koret School of Veterinary Medicine, Hebrew University, Israel in 1998, where he also completed a rotating small animal internship. In 2003, he completed his residency in small animal internal medicine at Penn Vet, and has served as a staff member in this department since then. He also serves as a Diplomate of the ACVIM. In July 2014 he completed a residency in nutrition. Dr. Mosenco is the head of Penn Vet’s program of radioactive iodine therapy for hyperthyroidism.

Erica Reineke, VMD, DACVECC, Assistant Professor of Critical Care
Dr. Reineke, a Diplomate of the ACVIM, began working as a critical care intern in 1998, where he also completed a rotating small animal internship. In 2003, he completed his residency in small animal internal medicine at Penn Vet, and has served as a staff member in this department since then. He also serves as a Diplomate of the ACVIM. In 2014 he completed a residency in emergency and critical care. Dr. Mosenco is the head of Penn Vet’s program of radioactive iodine therapy for hyperthyroidism.
