THE UNIVERSITY OF PENNSYLVANIA,
PHILADELPHIA, USA

A POSTDOCTORAL POSITION to study the roles of extracellular
vesicles and cytokines in biology, immunology and immunotherapy
of solid tumors utilizing genetic, biochemical, and molecular
approaches (for example, see Katlinskaya et al, 2016, Katlinski et al,

Highly motivated applicants with a recent PhD (or MD/analogue) and strong interests
in the areas of tumorigenesis, immunity and inflammation and experience in molecular/
cell biology and/or pathology and genetics of mouse disease models are encouraged to
apply. This position is supported by NIH grants. The training process is greatly aided
by a vibrant, intense and highly collaborative environment at the campus of the
University of Pennsylvania and the charm of Philadelphia, one of America’s most
important historical cities.

Interested applicants should e-mail a CV, publication list and a brief description of
research interests and experience to Dr. Serge Y. Fuchs, University of Pennsylvania,
Philadelphia, PA 19104, USA; e-mail: syfuchs@upenn.edu
