ID	Isolate	Level (cfu/ml)
21890	No Growth	0
21891	No Growth	0
21892	No Growth	0
21893	No Growth	0
21894	No Growth	0
21895	No Growth	0
21896	No Growth	0
21897	No Growth	0
Extender-2100	No Growth	0
Water-2100	No Growth	0

Number of Bacteria/mL present in sample
Scant <1,000 cfu/mL
Low 1,000-3,000 cfu/mL
Moderate 3,001-6,000 cfu/mL
Heavy >6,000 cfu/mL

† Indicated for microbiology evaluation (direct culture on extended semen / 48 hr enrichment followed by direct culture on water)

GC Althouse, DVM, MS, PhD, Dipl. ACT

Reproduction of this report in any form in whole or part, or use of the name of the University of Pennsylvania, its School of Veterinary Medicine, or the George D. Widener Hospital for Large Animals, without express written permission is prohibited. The reported findings are intended for in-vitro quality control use only.

Any type of sample submitted to the Reference Andrology Lab (RAL) and any microorganism isolated from a submitted sample becomes the property of the RAL.
